PROFILE

Backend developer who builds secure, scalable services in **TypeScript (Node.js, NestJS)**, **Python (Django)** and, where latency matters, **Rust**. At SAV built services for a finance and investment product on **PostgreSQL, Redis and Kafka**, deployed with Docker and Kubernetes. As a freelancer has shipped **17 live products** end to end, plus a trading engine that handles a market event in **0.3 µs**.

EXPERIENCE

Backend Developer · **SAV** Tehran · finance & investment — Feb 2025 – Jun 2025

- Designed and maintained modular **Node.js / NestJS** services for a finance and investment product, following clean architecture (OOP, MVC).
- Tuned data access across **PostgreSQL**, MySQL, **Redis** and Oracle NoSQL, and implemented event streaming with **Kafka**.
- Shipped with **Docker**, **Kubernetes** and CI/CD, and monitored services with Prometheus and Grafana.

Full-Stack Web Developer · **Freelance** Remote, Tehran — Jul 2023 – Present

- Built APIs, data models and deployments for live products with **NestJS**, Next.js Server Actions and **.NET** on PostgreSQL and MySQL.
- Designed booking, wallet and scheduling systems: prepaid play time for 20 gaming stations; reminders and pay across 6+ teaching platforms.
- Applied OWASP practices (JWT and OAuth 2.0, rate limiting, input validation, CSP, secrets) and automated delivery with Docker, GitHub Actions and Nginx.

SELECTED PROJECTS

Prophet — private repository
Low-latency crypto trading engine for 5 venues: 0.3 µs per event, ~30–50 µs from event to order (p50), deterministic replays, pre-trade risk gate.
Rust · WebSockets

Game Line — gamelinee.ir ↗
Bookings, a prepaid play-time wallet and live status for 20 gaming stations, with one login across every station's lock screen.
NestJS · .NET · MySQL / MariaDB

OLTS — olts.space ↗
Reads schedules from 6+ teaching platforms, sends reminders and tallies teachers' pay from one calendar.
NestJS · Next.js · TypeScript

Elahi Finance — elahi.finance ↗
Finance and investment platform built for fast, secure and reliable workflows.
NestJS · Next.js · TypeScript

Hyper Sadra — hypersadra.mnakhae.ir ↗
Installment store for home appliances with fast credit verification and nationwide delivery.
Node.js · Next.js

CCRU — ccru.ir ↗
Persian publishing platform for the CCRU archive, running since 2023.
NestJS · PostgreSQL · Docker · GitHub Actions

Full list of 17 live products: mnakhae.ir/projects

SKILLS

Languages	TypeScript, JavaScript, Python, Rust, C#, SQL
Frameworks	Node.js, NestJS, Bun, Hono, Elysia, Django, .NET
Data	PostgreSQL, MySQL / MariaDB, Redis, SQLite, Supabase, Oracle NoSQL
Architecture	REST, GraphQL, microservices, event-driven design with Kafka, clean architecture
DevOps	Docker, Kubernetes, GitHub Actions, CI/CD, Nginx, Vercel, Linux, Bash, Prometheus, Grafana
Security	OWASP Top 10, OAuth 2.0, JWT, CSP, CSRF / XSS / SQL-injection prevention, rate limiting

EDUCATION

B.Sc. Computer Engineering — Sep 2024 – Present
Islamic Azad University, South Tehran Branch

Physics (undergraduate) — Sep 2020 – Jun 2023
Sharif University of Technology · left to pursue computer engineering
